QUESTION 12

Doctor Appointment Booking Interface

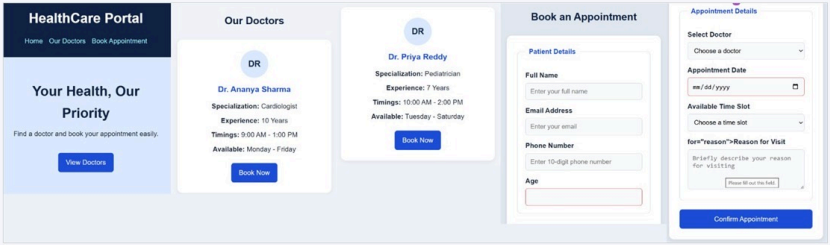

SELECTED QUESTION / STATEMENT

Design a website displaying doctor profiles, specializations, consultation timings, available appointment slots, and patient registration fields. Focus on clear form labels and easy navigation.

WEBSITE EXPLANATION

HealthCare Portal helps patients find a doctor and request an appointment. Doctor cards show specialties, experience, consultation hours, and availability; the booking form collects patient details, preferred date and time, and reason for visit.

QUESTION 28

User Account Portal

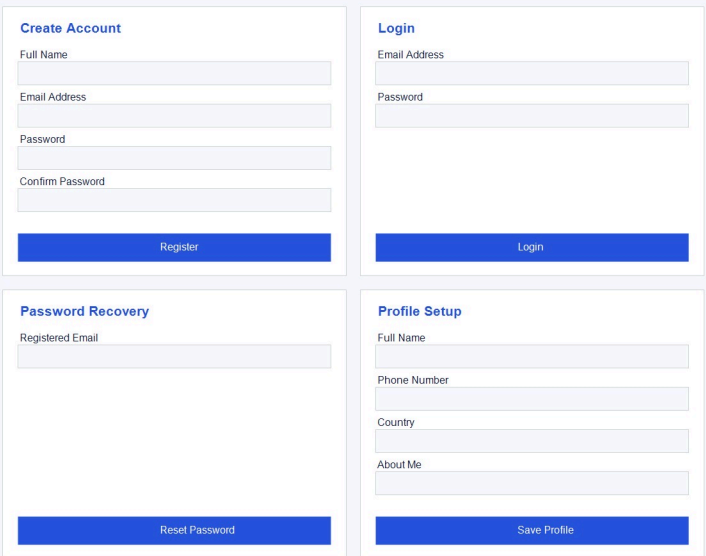

SELECTED QUESTION / STATEMENT

Create registration, login, password recovery, and profile setup pages. Use semantic HTML forms, validation-related attributes, password fields, accessible labels, and CSS focus and error states. Actual authentication requires a backend or suitable JavaScript implementation.

WEBSITE EXPLANATION

The User Account Portal brings account registration, sign-in, password recovery, and profile setup into one interface. Clearly labeled fields and visible focus or error states support usability and accessibility. Form validation can guide input; secure sign-in and password recovery require server-side or JavaScript authentication logic.

PORTAL PAGE PREVIEW

Implementation note

These screens show the interface. Authentication and password reset need working backend or JavaScript logic.

QUESTION 23

Gaming Portal

SELECTED QUESTION / STATEMENT

Develop a gaming portal containing game profiles, esports tournament schedules, team information, player profiles, leaderboards, and gaming news. Use dark themes, CSS effects, and structured ranking tables.

WEBSITE EXPLANATION

Nexus Arena is a dark-themed gaming community portal for discovering featured games, checking upcoming esports tournaments, exploring player and team profiles, and following leaderboard rankings and gaming news. Purple and cyan accents help key actions and information stand out.
